Merit Medical Leads Wire-Free Localization as SCOUT Procedures Surpass 200,000

Merit Medical has achieved an important milestone as SCOUT surpassed 200,000 procedures—far exceeding any other non-radioactive wire-free device. Our commitment to on-going product enhancements, customer training/support and clinical education contribute to this achievement. However, this milestone would not be possible without the input and support of our valued customers. Thank you for your partnership and commitment to reducing the burden that cancer places on patients and their loved ones.

Advanced Utilization of SCOUT® Radar Localization for Breast Cancer Surgery

DATE: Wednesday, June 16, 2021

TIME: 7pm ET/4pm PT

Merit Medical has partnered with the American Society of Breast Surgeons for an upcoming program: *Advanced Utilization of SCOUT Radar Localization for Breast Cancer Surgery*. The discussion features two key opinion leaders in the breast surgical oncology space who employ SCOUT throughout the management of breast patients.

Andrea Madrigano, M.D. FACS
Assoc. Professor, Dept of Surgery
Rush Medical College, Chicago, IL
Co-Director of the Breast Cancer
Service Line

Colleen Murphy, M.D.
Asst. Professor of Surgery—
Surgical Oncology
University of Colorado Health,
Aurora, CO

The program will focus on SCOUT's unique ability to facilitate oncologic approaches, support the de-escalation of axillary surgery, and use with NAC. We are thrilled to participate in this ASBrS Program and look forward to you joining us!

ON-DEMAND WEBINAR

The Preferred Localization Solution to Treat More Patients: SCOUT

In case you missed The Preferred Localization Solution to Treat More Patients: SCOUT at the 22nd Annual ASBrS Meeting, the program is now available for on-demand streaming. Viewing of the recording is open and not limited to those who attended the meeting.

Discover the state-of-the-art localization techniques practiced by key opinion leaders from the Cleveland Clinic, Columbia University, University of Colorado, Intermountain Healthcare and the Advocate System

TOPICS INCLUDE:

- Focused conversations around system-wide benefits gained from placing SCOUT at Time of Biopsy in the Axilla and for Highly Suspicious Breast Lesions
- SCOUT's use in Targeted Axillary Dissection and its support in lowering False Negative Rates
- SCOUT's use in conjunction with novel Sentinel Lymph Node Mapping Techniques

Educate Your Community

Merit is committed to supporting your goals toward community education and informing stakeholders on the patient benefits of SCOUT localization. To help with this, we have recently updated our SCOUT Communication Resources—turnkey tools that include PR materials, web and social media tools and more. Again, we are honored to partner with you to help reduce the burden that cancer places on patients and their loved ones.
